

Safety information marking

Safety information in this instruction manual draws attention to dangers that can arise from certain actions or the failure to take specific actions. They indicate the extent of any hazard arising from the failure to observe the safety measures specified therein.

The safety information in these assembly instructions is structured as follows:

WARNING!

This danger note draws attention to a potentially dangerous situation that may lead to death or serious injuries if the safety measures are not followed.

CAUTION!

This danger note draws attention to a potentially dangerous situation that may lead to minor or slight injuries if the safety measures are not followed.

NOTE!

This information draws attention to potential damage to property and the environment that may occur if the safety measures are not followed.

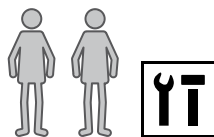

NOTE!

All installation work must only be carried out by qualified furniture fitters.

NOTE!

Carry out all installation work with at least 2 people.

WARNING!

Risk of injury and damage to property from unsecured furniture tipping over!

On opening unsecured furniture, they can tip over and cause serious injuries and considerable damage to property.

- When fitting furniture, secure them to the wall or floor with suitable fasteners to prevent them from tipping over.
- Follow the instructions of the furniture manufacturer.

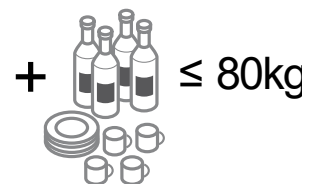

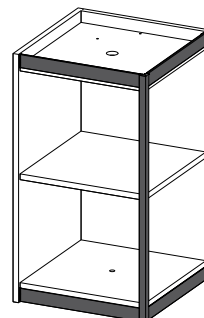

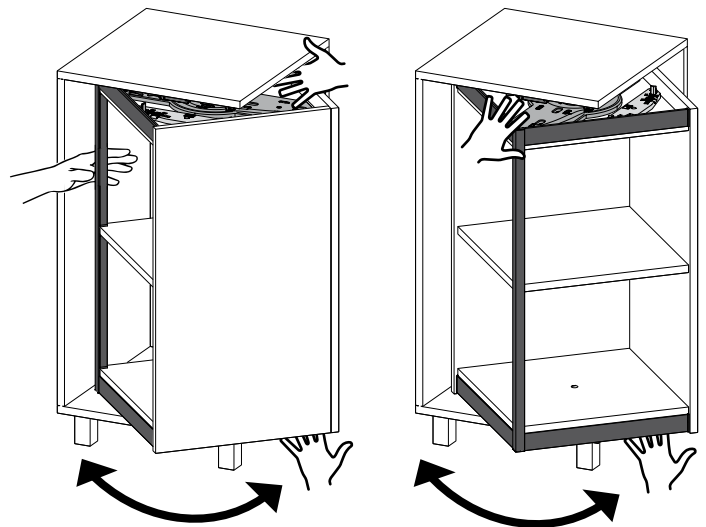

CAUTION!

Risk of injury from improperly assembled and fitted furniture!

Moving furniture parts can produce crushing and shearing points as well as sharp edges (e.g. for overlapping shelves), creating a source of injury.

Crushing points can result from opposite and cross corner furniture as well as from other objects.

- Construct and install furniture in line with the state of the art and only use appropriate furniture parts.
- Make sure that spacings at moving parts are less than 8 mm or greater than 25 mm.
- When planning and fitting cabinetry, be sure to allow a minimum distance of 500 mm to furniture positioned opposite or set across a corner.

Signalisation des consignes de sécurité

Les remarques de sécurité indiquées dans les présentes instructions signalent des risques qui peuvent être engendrés par des actions particulières ou si des actions n'ont pas été effectuées. Elles indiquent l'ampleur du danger en cas de non-respect des mesures de sécurité indiquées.

Les consignes de sécurité sont signalées comme suit dans les présentes instructions de montage :

**AVERTISSEMENT !**

Cette indication du danger signale une situation de danger potentiel pouvant entraîner la mort ou de graves blessures si les mesures de sécurité ne sont pas respectées.

**ATTENTION !**

Cette indication du danger signale une situation de danger potentiel pouvant causer des blessures bénignes ou légères si les mesures de sécurité ne sont pas respectées.

**REMARQUE !**

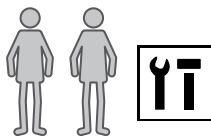

Cette indication du danger signale des dommages matériels et environnementaux possibles pouvant résulter d'un non-respect des mesures de sécurité.

**REMARQUE !**

Seul du personnel spécialisé dans les meubles est autorisé à effectuer les travaux de montage.

**REMARQUE !**

Effectuer tous les travaux de montage avec au moins 2 personnes.

**AVERTISSEMENT !**

Risque de blessure et de dommages matériels dû à un basculement de meubles non sécurisés !

Lors de l'ouverture de meubles non sécurisés, il est possible qu'ils basculent et causent de graves blessures et des dommages matériels considérables.

- Lors du montage, fixer les meubles au mur ou au sol pour les empêcher qu'ils ne basculent en utilisant des accessoires de fixation appropriés.
- Respecter la notice respective des meubles du fabricant de meubles.

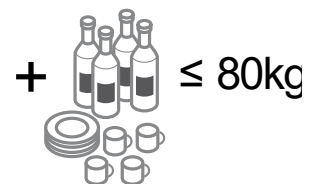

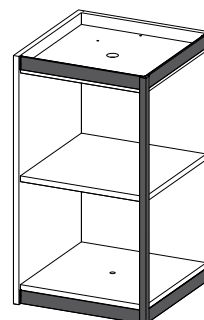

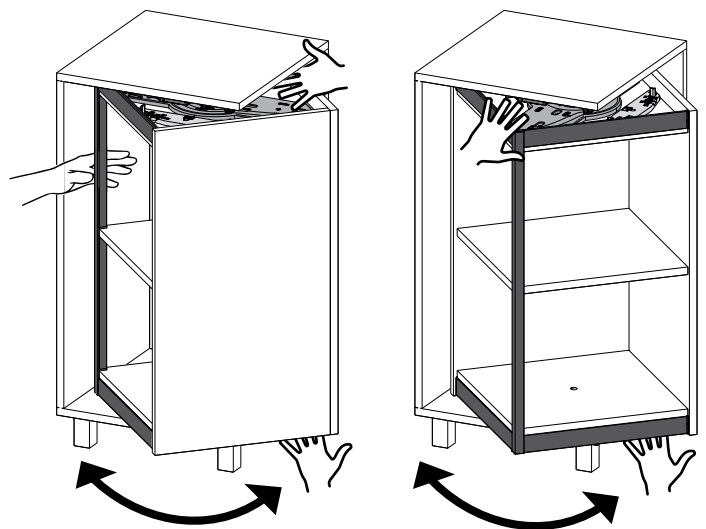

**ATTENTION !**

Risque de blessure dû à des meubles mal conçus !

Il peut y avoir des points d'écrasement et de cisaillement ainsi que des arrêtes vives (par ex. en cas de tablettes en saillie) au niveau des parties de meuble mobiles qui peuvent entraîner des blessures.

Des points d'écrasement sont possibles sur les meubles ou d'autres objets opposés ou disposés en angle.

- Construire et monter des meubles selon l'état actuel de la technique et utiliser uniquement des parties de meubles appropriées.
- S'assurer que les écartements entre les pièces mobiles sont inférieurs à 8 mm ou supérieurs à 25 mm.
- S'assurer de respecter un écartement minimum de 500 mm par rapport aux meubles opposés ou disposés en angle lors de la conception et du montage.

Señalización de indicaciones de seguridad

Las indicaciones de seguridad de estas instrucciones se refieren a peligros que pudieran darse por causa de ciertas acciones u omisiones. Indican el grado de peligrosidad en caso de no observancia de las medidas de seguridad mencionadas.

Las indicaciones relativas a la seguridad se estructuran en las presentes instrucciones de montaje de la siguiente manera:

¡AVISO!

Esta indicación de peligro hace referencia a una posible situación de peligro cuyas consecuencias pueden ser la muerte o lesiones graves de no observarse las medidas de seguridad.

¡CUIDADO!

Esta indicación de peligro hace referencia a una posible situación de peligro cuyas consecuencias pueden ser lesiones leves o de poca importancia de no observarse las medidas de seguridad.

¡NOTA!

Esta indicación de peligro es relativa a posibles daños materiales o medioambientales que podrían surgir si no se observan las medidas de seguridad.

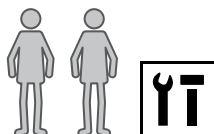

¡NOTA!

Todos los trabajos de montaje deben ser realizados exclusivamente por personal especializado en muebles.

¡NOTA!

Todos los trabajos de montaje deben realizarse entre al menos 2 personas.

¡ADVERTENCIA!

¡Peligro de lesionarse y de daños materiales por el vuelco de muebles no asegurados!

Al abrir muebles no asegurados, estos pueden volcar y ocasionar lesiones graves y considerables daños materiales.

- Durante el montaje, los muebles deben asegurarse a la pared o al suelo con medios apropiados para evitar que vuelquen.
- Deben observarse las instrucciones del fabricante de los muebles.

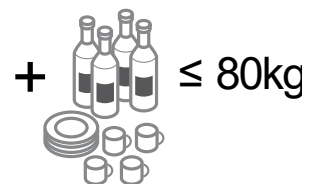

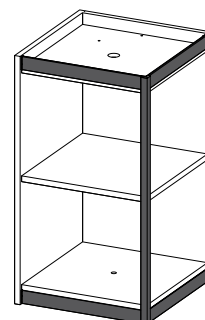

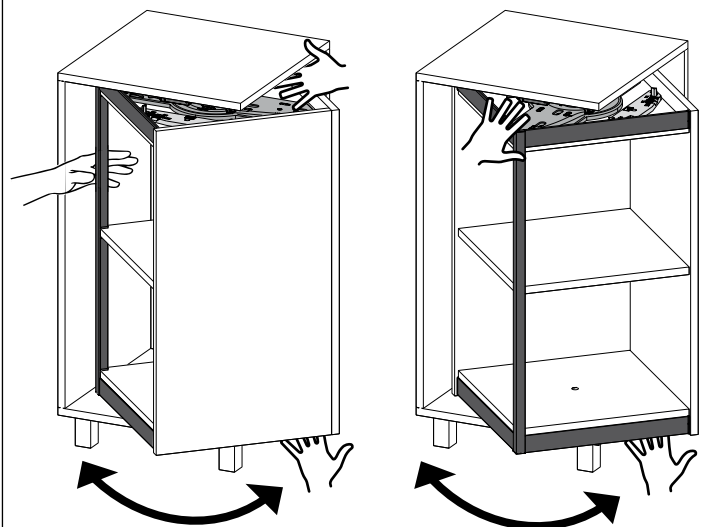

¡CUIDADO!

¡Peligro de lesiones por muebles mal instalados!

Las partes móviles de los muebles pueden crear puntos de aplastamiento, cizallamiento así como bordes afilados (por ejemplo, en caso de estantes que sobresalen) que causen lesiones.

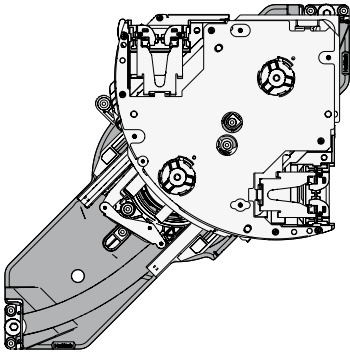

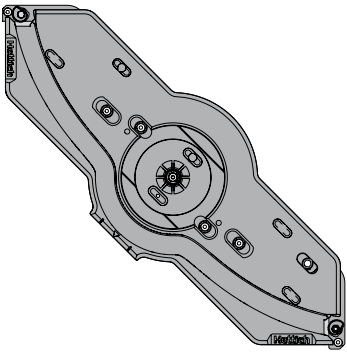

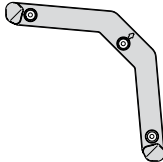

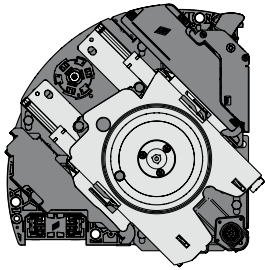

En muebles y otros objetos colocados frente a las esquinas o a través de ellas pueden generarse puntos de aplastamiento.

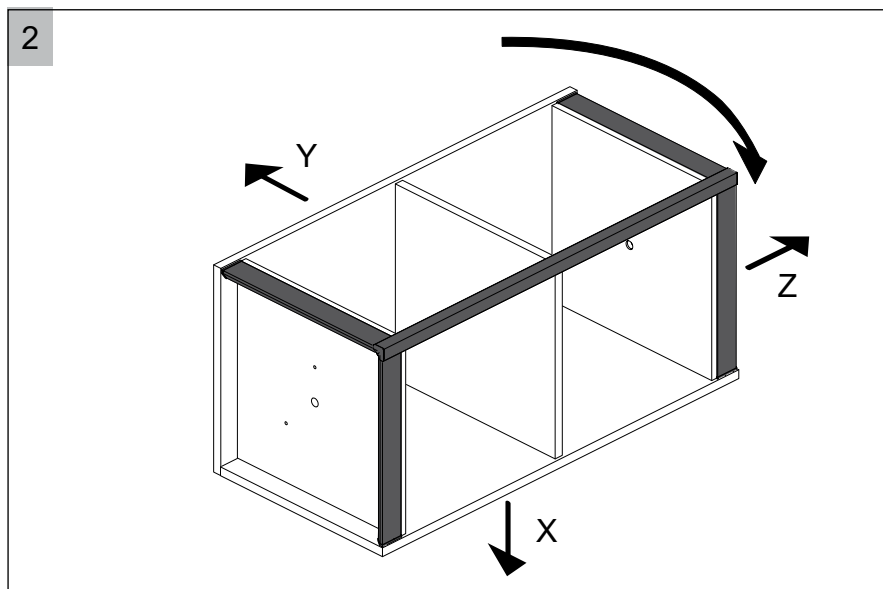

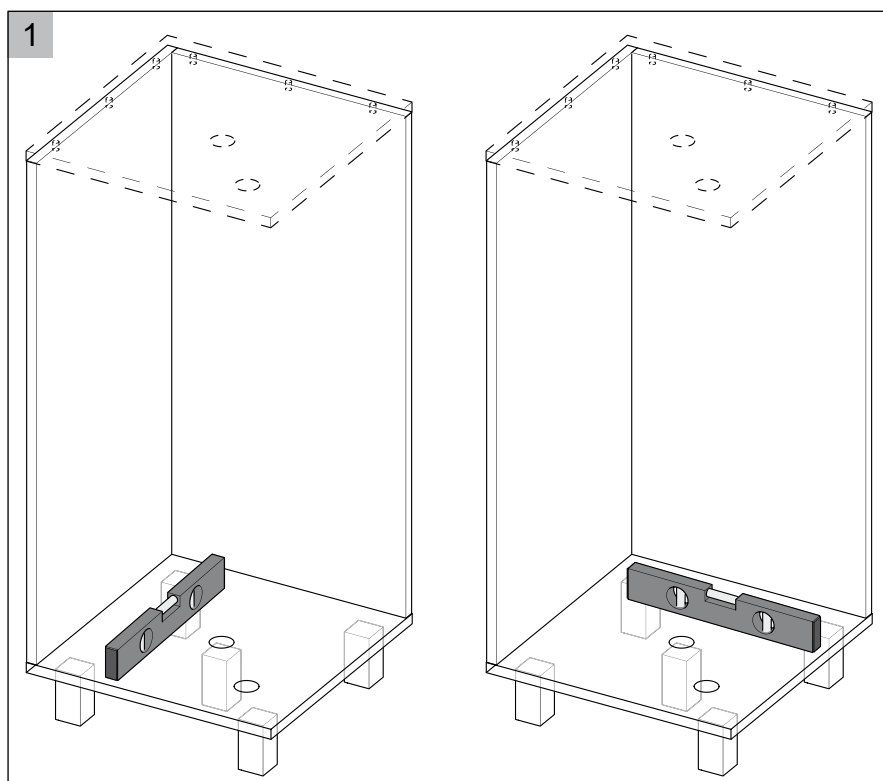

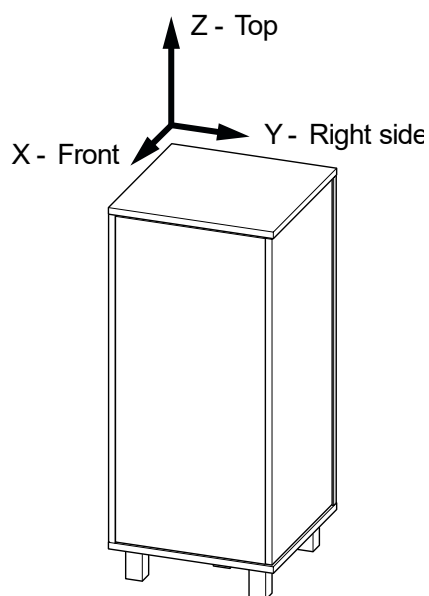

- Los muebles deben fabricarse y montarse observándose los actuales conocimientos tecnológicos y solo deben emplearse piezas de mobiliario adecuadas.
- Hay que asegurarse de que las distancias en los componentes móviles sean menores de 8 mm o mayores de 25 mm.
- Hay que asegurarse de que durante la planificación y el montaje se respete una distancia mínima de 500 mm respecto a los muebles situados enfrente y dispuestos en esquina.
